

## Taking Action with Climate Friendly™ Sustainability Statement

"Envirofleet is taking action on climate change by working with Climate Friendly to measure and offset greenhouse gas emissions associated with its carbon footprint.

Envirofleet is committed to mitigating climate change by offsetting 24 tonnes of greenhouse gas emissions with VCS renewable energy carbon credits sourced by Climate Friendly from the Gudhepanchani wind farm, India. These emissions include:

**24** tonnes to offset company fleet

Envirofleet will continue to work with Climate Friendly to benchmark their carbon footprint reductions through carbon accounting and regular benchmarking.

Envirofleet is committed to making a difference by taking action on climate change now and working toward a clean energy future. To find out how you can take action visit [www.climatefriendly.com](http://www.climatefriendly.com)."
